

SEPTEMBER 12, 2019 | OSHA INSPECTIONS, CITATIONS & ENFORCEMENT

OSHA's Electrical Safety Standards: 5 Reasons to Get it Right and 10 Common Mistakes [Webinar Recording]

On September 24, 2019, **Micah Smith**, **Aaron Gelb**, and **Dan**

Deacon of [Conn Maciel Carey's national OSHA Practice](#) presented a webinar regarding "[OSHA's Electrical Safety Standards: 5 Reasons to Get it Right and 10 Common Employer Mistakes](#)."

Electrical safety has long been an enforcement priority for OSHA. OSHA's electrical standards are designed to protect employees against hazards of electric shock, electrocution, flash fires, and explosions. Often, workers and/or their

employers are unaware of the potential electrical hazards present in their work environment, and even more often, they are unfamiliar with the nuances of OSHA's regulatory requirements in this area. [This webinar](#) will highlight the top 5 reasons it is critical for employers to get compliance with OSHA's electrical safety standards right, explain the 10 most misunderstood and misapplied provisions of the applicable OSHA standards, and discuss strategies to limit exposure to the most common electrical safety violations.

Specifically, participants in [this webinar](#) learned:

- The top 5 reasons why employers must prioritize compliance with OSHA's electrical safety standards
- Employers' 10 most common electrical safety mistakes
- Steps employers can take to minimize electrical safety hazards and OSHA violations

We are pleased to share these links to [a copy of the slides](#) and [a recording from the September 24th webinar](#). Let us know if you have questions about OSHA's electrical safety standards or any other OSH law issues. We

would love to be a resource for you.

The September webinar was the 9th webinar event in Conn Maciel Carey's [2019 OSHA Webinar Series](#).
