[Webinar Recording] Process Safety Update: The Latest with OSHA PSM & EPA RMP

On November 17, 2020, Eric J. Conn, Micah Smith and Beeta Lashkari presented a complimentary webinar: **Process Safety Update: The Latest with OSHA PSM & EPA RMP**.

Following the 2013 West Fertilizer explosion, then-President Obama issued Exec. Orders directing OSHA, EPA and other agencies to "modernize" the chemical process safety regulatory landscape. OSHA and EPA took sweeping actions, from enforcement initiatives (like a new PSM National Emphasis Program) to rulemakings and interpretation letters.

Then President Trump took office with a de-regulatory agenda. But rather than unwavering deregulation, Trump Admin. initiatives in this area have been splintered, with some deregulatory work proceeding (e.g., rollback of RMP amendments), others coming to a complete halt (e.g., PSM reform rulemaking), and still others moving forward like business as usual (e.g., the Chem/REF PSM NEP inspections and the CSB's new accidental release reporting rule). And now, with the Presidential Election behind us (sort of), and a new Biden Administration looming, we could see another significant shake-up of the regulatory landscape.

This webinar reviews the status and likely future of OSHA's PSM Standard and EPA's RMP Rule, CSB developments, and other process safety issues, such as the recent 10th Cir. Decision on PSM application to interconnected and co-located vessels.

We are pleased to share links to a copy of the slides and a recording of the webinar.

This was the 11th regularly scheduled webinar in the **2020 OSHA Webinar Series**. Click **here** to view our full schedule, detailed program descriptions, and individual registration pages for the remaining webinars in the **2020 OSHA Webinar Series**. Like so many other aspects of our lives, our Annual Process Safety Summit in Washington, DC will look a little different in the year of COVID-19. Rather than gathering together in person in our Nation's Capital for two full days in October, the 3rd Annual Process Safety Summit will be a virtual event, and it will take place in shorter segments on December 8-9, 2020.

But what will not change is the Summit's one-of-a-kind opportunity to convene safety and legal professionals from chemical manufacturing, petroleum refining, paper, and other process industries with the senior government officials responsible for regulating process safety. Check out our **working agenda** and register today.

Check out the **Process Safety Summit website** for updates.

Register now! General admission is $50.00.
