What Employers Need to Know About the Monkeypox Virus [Webinar Recording]

On September 6, 2022, [Kara M. Maciel](#), [Eric J. Conn](#) and [Ashley D. Mitchell](#) presented a webinar regarding **What Employers Need to Know About the Monkeypox Virus**.

On July 23rd, the World Health Organization declared Monkeypox a Public Health Emergency of International Concern. By late July, the U.S. surpassed 10,000 total cases, and the Biden Administration declared it a public health emergency. While the Monkeypox Virus is less transmissible than COVID-19 and rarely fatal in its current form, there are still workplace safety and health considerations employers will have to address.

Participants in this webinar learned:

- Background about the Monkeypox Virus, including common symptoms and modes of transmission
- Strategies for employers to prevent workplace exposures while complying with Federal and State level labor employment laws
- Employee communication strategies about this latest public health crisis
- Potential OSHA recordkeeping and reporting obligations

We are pleased to share these links to a [copy of the slides](#) and a [recording of the webinar](#).
